**Threat Detection through Electromagnetics**

Strict requirements and detection needs call for security checkpoints to perform efficiently even under very challenging conditions.

The **PMD2 Plus detects firearms and knives, even when they are hidden within body cavities**, and accurately indicates the position of the threat, its intensity and its prevalent composition.

## KEY CONSIDERATIONS TO CHOOSE THE RIGHT METAL DETECTOR

The **PMD2 Plus** satisfies all the requirements

### MOST POWERFUL AND VERSATILE SECURITY FEATURES

- Up to 50 built-in Security Programs
  - ▶ Up to 30 International Standards
  - ▶ Up to 20 Customizable Levels

Users can choose directly from the known International Standards or request implementation of a Standard personalized to their own requirements. Users can also create their own program and save it in internal memory for later use.

- Chip Card system for fast, simple and secure parameter changes (i.e. alarm volume and tone, counter reading, etc..and security level selection
- Any security standard can be enhanced with selectable random alarm probability

### CHIP CARD SYSTEM

The system allows the Head of Security to **set Security Level quickly, reliably** and without having to program the device in any way.

## DETECTION OF ALL METALLIC THREAT ITEMS

- Capability to detect the full range of metal weapon threats even within body cavities
- Quick, accurate analysis of all parts of the body of people in transit, from the shoe level to the crossbar
- Guaranteed coverage for all orientations and locations, never in need of calibration
- Met-Identity technology for Identification of Threat Composition

## HIGH DISCRIMINATION & THROUGHPUT

- Cutting-edge discrimination technology allows personal effects to be ignored, creating rapid transit flow
- No need to remove items such as belts, coins, keys, jewelry, watches, wallets, etc.
- Better Discrimination = Shorter Lines and/or Less Staffing

## IMMUNITY TO EXTERNAL INTERFERENCES

## 60 LOCALIZATION ZONES

**60 Localization zones** (20 vertical x 3 lateral) with left, center and right indication.

**Exceptional immunity to environmental interferences** makes the Metal Detector easy to use even when electrical noise is encountered.
