THREAT DETECTION THROUGH ELECTROMAGNETICS

The SMD601 Plus is a very high sensitive Walk-Through Metal Detector.

A full-height light bar displays the location of the detected metal masses in transit. This results in rapid identification of threats and a reduction or elimination of the need for manual searches.

SMD601 Plus detects even the smallest metal items **anywhere on or in the body**.

FULLY COMPLIANT WITH THE NIJ-0601.02 AND NIJ-0601.03 STANDARDS

The SMD601 Plus further extends the detection sensitivity of the previous SMD601 to metal threats before considered undetectable due to their minimal dimensions and metal composition similar to the ones specified in the new **NIJ-0601.03 Standard**:
